

Technical Data Sheet

Product Name: Gunwash

Date Issued: 6 August 2025

Product Description

Gunwash is a blended solvent cleaner formulated for cleaning spray guns, lines, and other application equipment used in painting operations. It effectively dissolves most solvent-based paint residues, ensuring clean and reliable equipment function.

Not for use as a paint thinner.

Typical Properties

Property	Value / Description
Appearance	Clear liquid
Odour	Solvent-like
Specific Gravity (at 20°C)	0.78 – 0.82
Flash Point	< 0°C (Closed Cup)
Solubility in Water	Immiscible
VOC Content	Typically high
Evaporation Rate	Fast
Flammability	Highly flammable
Shelf Life	2 years (in sealed container)

Composition

Gunwash typically contains a blend of hydrocarbon and oxygenated solvents such as:

- Aliphatic hydrocarbons
- Aromatic hydrocarbons
- Ketones
- Alcohols and/or esters

Exact composition varies by manufacturer.

Applications

- Cleaning spray guns and lines
- Flushing hoses and pumps
- Equipment soak cleaning

Do not use as a thinner in coating applications.

Handling and Storage

- Store in a cool, well-ventilated area away from ignition sources
- Keep container tightly closed when not in use

- Use with appropriate PPE: gloves, goggles, and in ventilated areas
- Refer to SDS for full safety instructions

Packaging Options

- 4L
- 20L
- 200L

Disclaimer

The information above is based on general industry knowledge and is offered as a guide only. Product performance and characteristics may vary. Always test before use. Refer to the Safety Data Sheet (SDS) for detailed safety instructions.
