## The Solution for Coating Modern Furniture & Cabinetry

ILVA

Ilva products are created in the world's largest, most advanced wood coatings facility, where over 200 dedicated researchers work with cutting-edge equipment to shape the future of wood coatings. The process is meticulously managed to deliver consistent quality and customer satisfaction.

Targeting the modern furniture market, Ilva products meet the needs of manufacturers and consumers by offering high performance, ease of use, and aesthetic appeal. Adhering to stringent safety standards, Ilva products are produced to protect both people and the environment.

# COAT WITH CONFIDENCE

## Superior Timber Coatings

**Superior Timber Coatings specializes in supplying premium paints and coatings, along with expert technical advice, to customers in the Australian Construction, Manufacturing, Painting, and DIY sectors.**

Our goal is to enhance the value of your paint project by understanding your needs and offering tailored solutions that improve performance, productivity, reliability, sustainability, and safety.

Our motto, "Coat With Confidence" embodies our dedication to delivering coatings that offer protection, quality, beauty, and peace of mind.

# ILVA COLOUR SYSTEM

## 2K POLYESTER & POLYURETHANE UNDERCOAT

## ILVA PI30 POLYESTER UNDERCOAT

- Extremely high build and highly stable, offering a reliable base for premium finishes on MDF and paint-coated board products.
- Provides excellent coverage with strong vertical hold, ensuring uniform application and superior edge retention.
- Minimises sink-back, maintaining a consistent sheen for excellent topcoat results.
- Features a sufficient pot life, enabling efficient use over extended production cycles and reducing waste.
- Optimised for high productivity and economical outcomes, making it ideal for large-scale production environments.

## ILVA PAS5AB3 POLYURETHANE UNDERCOAT

- Delivers exceptional adhesion, creating a reliable foundation for high-performance topcoats that enhance durability and finish quality, and is especially suitable for use with robotic spray lines.
- Minimises sink-back to ensure a smooth, consistent sheen across all topcoat applications, enhancing the overall aesthetic.
- Provides high stability and excellent vertical hold, especially on edges. Minimises exposed fibre raising on raw mdf board.
- Designed for ease of sanding and rapid drying, significantly improving workflow efficiency and reducing downtime.
- Offers a stable, high-build base that supports premium finishes and achieves outstanding performance results.

# THE ILVA COLOUR SYSTEM

## 2K POLYURETHANE COLOURED FINISHES

## ILVA MATT / SATIN TOPCOAT

### CONSISTENT WHITE BASE, UNIFORM FINISH

- Provides exceptional coverage, surface hardness and durability, making it ideal for kitchen panels, furniture, interior timber and MDF surfaces.
- Genuine yellowing resistance ensures long-lasting colour consistency and aesthetic appeal.
- Offers minimum sink-back for a uniform finish.
- Delivers an exceptional look and feel, enhancing the overall quality of finished surfaces and leaving a lasting impression on clients with its outstanding aesthetics.
- Excellent heat and chemical resistance enhances durability and performance in demanding environments.
- Available in 10% matt, 20% satin and other sheen levels, perfectly aligning with current designer trends.

## ILVA GLOSS TOPCOAT

### ULTIMATE GLOSS, FAST PRODUCTION CYCLE

- High solid content ensures exceptional coverage, durability and wear resistance, ideal for demanding applications.
- Fast-drying formula makes completed substrates stackable in a shorter time, enabling quicker turnaround and improved efficiency.
- Genuine yellowing-resistant hardener maintains colour integrity and aesthetic appeal over time.
- Outstanding heat and chemical resistance enhances surface durability and long-term performance.
- Offers a full gloss finish with uniform results and distinct visual appeal, perfect for kitchen panels, furniture, and interior timber and MDF surfaces.
