Technical Data Sheet

Product	PT410							
Description	Aquatech WB White Primer							
Colour	White							
Woods for which the product is	Beech							
suitable	Walnut							
Substrates for which the product	Solid wood							
is suitable	MDF (Medium Density Fiberboard)							
	Veneer							
Chemical-physical Properties	Density (Kg/l)	1,360	±	0,030				
	Density (lb/US gal)	11,3	±	0,3				
	Solid content %	57,0	±	2				
	c.a. Viscosity Brookfield (20°C - 68°F)	V.	10,0	S.	3			
		c.a.	5000	±	1000	cPs		
USAGE INDICATION	ONS	•						
The product, after o	eareful mixing, is ready to use							
READY TO USE P	RODUCT PROPERTIES							
Application	Application system	Quantities	S					
	Airmix spray (for automatic plants)	gr/m² min Wet Mil:		130	-	150		
		ma	ΙX	3,8	-	4,3		
	Hand spray	gr/m² min Wet Mil		130	-	150		
		ma	1X	3,8	-	4,3		
	ERTIES AFTER APPLICATION							
Drying								
	Room temperature drying (18-22°C / 64 – 72°F e 65-70% relative humidity) complete drying	72	h					
	Dust free	50	min					
	Touch dry	75	min					
	Hard dry	5	h					
	Stackable after room temperature drying	24	h					
	Sandable after (time)	3-4	h					
	Overcoatability time	8						
	Overcoatability time between layers	2-4	h					
	Maximum time between layers without sanding	3	h

Website: superiortimbercoatings.com.au

	Laminar flow cabinet drying	Temp°C	35		
		Temp°F	95		
		Air speed m/sec	1,2		
		Air speed ft/sec	3,9		
		120 min			
	Stackable after jet hot air drying	4 h (with spacers)			
Shelf life	12 months after production				
SPECIFIC WARNINGS	If required, thin with water up to 5% (max)

WARNINGS

In a coating process with professional products:

- besides the product quality, the final result also depends on numerous other variables, such as environmental conditions; homogeneity in the quality of the support; the constancy of the application cycle; the plants performance; the proper use of the product, etc.
- in the process of industrial coating a certain waste of product is to be considered normal and therefore not attributable to product quality
- The final colour is influenced by quality and the preparation of the support and the conditions of application, for this reason it is essential to check in advance the result in terms of final use

Our Company cannot ensure the control of the coating process carried out by the user. We cannot, therefore, take on any responsibility for the final result achieved through the use of our products.

On the other hand, we guarantee the consistency of the chemical and physical characteristics of the product indicated in the relevant Technical Data Sheet, pledging to replace it if it does not correspond to the declared features

Data on the chemical and physical characteristics of the product are recorded at 20°C / 68°F and 70% R.U.

For best results, the optimum conditions of application are:

- Ambient temperature between 18 and 22°C (64 72 °F)
- ambient relative humidity between 65 and 70%
- support humidity between 8 and 14%

The conditions to be observed scrupulously are:

- Water-based products are particularly sensitive to storage conditions: temperatures below 5 °C / 41°F and above 35 °C / 95°F may affect the product, characteristics, making it unusable. For this reason, a water-based product should be stored indoors at temperatures not below 5 °C / 41°F and not above 35 °C / 95°F, in a properly ventilated place, not exposed to solar radiation
- Always shake the products well before use
- Before use, always shake well the product mixed with any other components such as catalysts, accelerators, thinners
- The application must not take place at a temperature lower than 15 °C / 59°F or above 30 °C / 86°F
- The drying should not take place at a temperature below 15 °C / 59°F
- The ambient relative humidity during drying should be between 50% and '70%
- To decant paints, exclusively use containers made of suitable material, such as polyethylene and stainless steel
- After use, we recommend that you always close the can carefully

The end result of the coating cycle is the sole responsibility of the users, who must make sure that the product matches their needs and that environmental conditions, application or media specifications do not require substantial changes of use

It is the user's responsibility:

- Adhere to the conditions indicated above
- comply with the rules of hygiene and safety during product application, according to the descriptions given in the safety data sheets
- for solvent-based products spark-proof equipment should be used
- It is forbidden to smoke while using the product

At the bottom of each sheet there is a date of validity

The Company invites you to check with their staff that the product data sheet in your possession is the most updated, since the characteristics of the products are subject to adjustments over time For more information, please contact (see below):
